Review CNovember 18, 2008Page 3 of 174About This documentWho should read this documentWho should read this documentWhat should be This document is intended for the following audiences:MD0003-132Read this document MICROS Installers / Programmers MICROS Dealers MICROS Customer Service MICROS Training Staff Symphony Users ReaderWhat Should Already KnowIt's Document Suggests that you have the following knowledge or experience: Operational Understanding of PC Terminology and The Concept Understanding of basic network concepts Working knowledge of the Microsoft Windows interface, and in particular with Microsoft Windows 2003 Server Understanding the basic network concepts Familiarity with 9700 software and peripherals History documents with the release of each package of services, this document is revised to include all changes in the product. With each issue, a new review number is assigned. The table below is the history of this version of this document:Please note that before reviewing the A documentation 9700 Version 3.1 Pack 7 was not assigned an editorial number. RevisionVersion 3.1 SP9 CVersion 3.1 SP8 BVersion 3.1 SP7 ARevision C November 18, 2008Page 4 1749700 1749700 1749700 УстановкаЗаргуака пакета услуг Pack9700 Программное обеспечение InstallationMD0006-065Заргуакуть пакет услугЭто пакет услуг включает в себя файл 9700HMS310SP9.exe, который является самодобывания файла. To download a file from the MICROS FTP website to your computer, follow the steps below.1. Enter the www.micros.com with the username and password in member support services.2 On the participants' service page under the headline Product Support, click on micros Products.3 hyperlink. On the MICROS product page, click on hyperlink 9700.4. On page 9700 HMS click 9700 HMS Version 3.10.5. If necessary, download the latest NetVupoint package by clicking on the 9700 V3.10 SP 9 NVP link. The file name for the latest NetVupoint service package is 9700HMS310SP9NVP.exe. This file is only for sites that use NetVupoint.6 Conversion Service. To download the service package documentation, click on the link to 9700 V3.10 SP 9 RMF.7. To download the 9700 service package, click 9700 V3.10 SP 9. The file name for the 9700 service package is 9700HMS310SP9.exe.Revision CNovember 18, 2008Page 5 of 1749700 Installation SoftwareInstall 9700 Service PackInstall 9700 Important: Do not upgrade your system if there are any CLIENTS SAR MD0003-132Service Pack offline that may have checks. Please be sure to have your SAR customers online before the update. MICROS also recommends the use of a package after the start date of the day is incrementally and credit card packages/settlement. 1. Open the Enterprise Management Console (EMC) on the 9700 server. Open the control module from the menu bar and click Down Radio to knock down the MICROS 9700 system. On request, stop the 9700 system?, click Yes.2. From your Windows desktop, select the Starter Table Settings Control Panel Administrative Tools Services and stop the MICROS 9700 POS multiplexer. A quick box will let you know that the POS MICROS 9700 service will also be stopped. Choose Yes to stop these services. Find the patch and two clicks 9700HMS310SP9.exe. (Note: The patch should not be launched from the MICROS les-POS catalog or any of its subdirectories.) Follow the installation instructions. When the installation is complete, restart the system on demand. When the system returns, use the control panel in EMC to launch 9700 POS systems and 9700 POS-module operations. The revision of CNovember 18, 2008Page 6 of 174PCI ComplianceInstall 9700 Service PackPCI ComplianceM0006-065Visa established the Payment Card Security Standard (PCI) to protect visa card holder's data whenever he resides, according to the fact that members, merchants and service providers maintain the highest standard of information security. To adhere to the PCI standard, changes have been made to the 9700 HMS product. Please read this section carefully, as well as the accompanying documentation of the PCI-compliance. List of relevant documents See the Documentation Resources section. For more information on PCI and Software changes are provided in the following sections: Documentation Resources PCI Compliance Installation Security Change AnnouncementRevision CNovember 18, 2008Page 7 of the 174PCI ComplianceInstall 9700 PackDocumentation Service Following documents have been updated with information and MD0003-132Resources procedures required to maintain PCI compliance and must be consulted for security purposes prior to updates with the 9700 Version 3.1 SP5 and below 9700 Version 3.16 and above. These documents are available on the 9700 Products page on the MICROS Member Support website. 9700 PA-DSS Compliance v. 3.10: This document provides a 2nd Reference Guide that provides information on MICROS compliance with the PCI data security standard and compliance with the Payment Application Security Standard (PA-DSS). 9700 Secure Account Processing by Default: This document contains detailed information about 9700 v. 3x secure default account processing procedures. These procedures must be followed to prevent compromised safety and maintain PCI compliance. 9700 Security Guide: This document describes the security design of the 9700s, features that track employee actions undertaken in the system, and features that limit employees' access to databases, reports, and operating procedures. 9700 Update Best Practices: This document is designed to convey best practice information when updating the 9700 HMS app from a non-PCI compatible version (version 2.x) for the PCI compatible version (3.x version and more). MICROS 9700 Encryption Key Management Utility: This document is a quick reference guide that provides information about 9700 Encryption Key Management Utility that allows the user to install an encryption formula for the 9700 system. MICROS Secure Tool Wipe: This document contains instructions on how to download and use the safe Eraser wipe tool. Secure data removal is necessary when updating a version of the micros software that is not compatible with PCI, or when collecting customer data to fix problems and no longer need to.
